Kelly's True to Name Fruit Trees for Fall Planting

Our 59 years experience in the nursery business has proven to us that Fall is a practical and desirable time to plant fruit trees, especially Apples, Pears, Plums, Sweet and Sour Cherries, and other kinds of nursery stock.

PLANT THIS FALL

Fall planted trees make some new root growth before Winter sets in and the earth becomes firmly packed about the roots during the Winter months. As a result of this, they make an early, vigorous start the following Spring, which is so essential for best results. The Fall planting season begins just as soon as the trees and bushes reach a dormant condition, which is usually about the middle of October, and extends until the ground freezes solid.

VISIT OUR NURSERIES

We invite you to come to our Nursery and pick out your own trees. Many of our customers do this and find it very satisfactory to select just the variety and type of trees that best meet their needs. You are always welcome at our Nursery.

We have had an unusually fine growing season, and thus are able to offer you exceptionally healthy, vigorous stock at these special prices. You will never regret planting Kelly's trees.

We offer Free Delivery on Orders for Fruit Trees amounting to \$5.00 or more.
